EXPERIENCE

Capgemini USA, Cincinnati OH — *Senior Consultant*

OCTOBER 2018 - JULY 2025

- Lead developer in React, Angular, Azure, JS/HTML/CSS, and SQL
- Agile Scrum engagement manager, overseeing multiple development streams, leveraging Jira,Trello, and GitHub, and delivering robust, fully-functioning sites and features per project deadlines and budgets
- Mentoring team and client on UI, development, analytics, SEO, performance, and accessibility best practices; challenging colleagues to gain new skills in automation and AI; lead unit training sessions in continuous integration and deployment pipelines employing Azure DevOps
- Pursuing contracts, defining project KPI's, and interviewing new employees

SELECT PROJECTS

- **P&G Product Lifecycle Innovation - *Lead Developer***
  Harnessing Angular, Node.js, MongoDB, MySQL, Office365, SharePoint, and Azure IaaS, developed web applications that streamline access, training, and support processes for 40,000+ technicians across the globe in the product life cycle space; managed request and incident service using ITIL methodology in ServiceNow; created scalable automations and RESTful APIs for cross-organization operations with Python, PHP, and Power Automate; visualized analytics in PowerBI, and addressed unique search and content strategies, security audits, architecture planning, and requirement gathering.

- **Oral-B Smile Meter - *Lead Developer***
  Utilizing Swift, React, Node.js, and Python, developed a suite of iOS applications providing gamified brand experiences, guest registration, facial recognition and welcome center interactive wall displays for P&G's innovation centers in Asia, Middle East, and North America; worked with client, QA teams and UX designers to create delightful customer interactions with brands.

- **HairCode.com Latin America - *Lead Developer***
  Incorporating Contentful CMS, ReactJS, Azure, Klaviyo CRM, and Google Analytics, introduced internationalized content to eight regions in Central and South America, increasing traffic 5x over its North American counterpart; worked closely with client partners, QA, and translation experts to solve foreign language needs and features.

- **HairCode.com North America - *Contributing Developer***
  Deployed Azure functions, CosmosDB, and scalable storage solutions to host a React hair quiz application with millions of visits and click-through traffic to brand and retail websites.

- **Pantene.com - *Contributing Developer***
  Integrating ReactJS, Gatsby, Azure, Google Analytics, migrated SiteCore to Contentful and provided easier content management; worked with design agency, product owners, and QA team to improve Lighthouse Audit scores and reduce load times by 200%; implemented Google Tag Manager and SEO improvements
